Diamond Sear Cooking Grids*

- Diamond Sear cooking grids promote more optimal heat transfer to food. With more surface area, similar to a griddle, their shape with angled sides improves the flow of heat to the cooking surface.
- Diamond Sear cooking grids are easier to cook on as foods release from the surface more easily with less sticking.
- Diamond Sear cooking grids have more contact surface than round grids. This provides more points of contact that help to sear your meat better and faster.
- More efficient heat transfer and quicker cooking result in less use of gas.
- * U.S. Patent Nr.: D857,453 & D862,984

ADVANCED HEAT DISTRIBUTION SYSTEM

Fire Magic® grills provide more cooking area than other grills and more kWh per square foot of cooking surface.

Flavour Grids

- Heavy gauge stainless steel flavour grids minimize flare ups, provide quick and even heat distribution, and flavour food by vaporizing juices.
- Designed to provide distributed heat to the cooking grids; they don't retain or block heat from rising.
- Easy to clean and maintain.
- Simple to remove when rotisserie cooking (for largest rotisserie area).
